DIV. OF OIL, GAS & MINING

**NOTICE OF INTENTION TO COMMENCE SMALL MINING OPERATIONS**

The information requirements of this form are based on provisions of the Mined Land Reclamation Act, Title 40-8, Utah Code Annotated 1987, and the General Rules as promulgated under the Utah Minerals Regulatory Program (R647). The rules and Act are available online at <http://www.rules.utah.gov/publicat/code/r647/r647.htm> and [http://le.utah.gov/~code/TITLE40/40\\_08.htm](http://le.utah.gov/~code/TITLE40/40_08.htm).

Cultural Resources Survey: To fulfill its obligations under Utah Code Annotated 9-8-404, the Division needs cultural resource (archaeology) information. The amount and type of information required will depend on the mine location, the history of previous disturbance, and other factors. Please contact the Division for further information.

A permit fee of \$150 must accompany this application (Utah Code Ann. §40-8-7(1)(i)) and is due annually.

"Small Mining Operations" are operations which have a disturbed area of ten or fewer surface acres at any time in unincorporated areas, or five acres or fewer in incorporated areas.

3. **Location and Operations maps** must be plotted at a scale to accurately identify locational landmarks and operations details. All maps must include a north arrow, scale, appropriate labels, and title box including the mine name, township, range and section.
  - a. The **general location map** must be the scale of a USGS 7.5 minute series map or equivalent (1"=2000') and identify new or existing access roads.
  - b. The **operations map** (1"=200' or other scale as determined necessary by the Division) must be labeled and identify:
    - i. The area to be disturbed;
    - ii. The location of any existing or proposed operations including access roads, drill holes, trenches, pits, shafts, cuts, or other planned activities; and
    - iii. Any adjacent previous disturbance for which the operator is not responsible.
 (Contact the Division for a list of consultants and land surveyors for mapping assistance.)
4. The proposed (5 acre or less) disturbed area (including access/haul roads) should be marked ON THE GROUND with metal T-Posts (or with some other marker of equal effectiveness). Markers should be appropriately spaced so that the next marker in either direction is clearly visible with the naked eye.

1. **Type of mining:** Surface (X) Underground ( )
2. **Mineral(s) to be mined:** SAND & GRAVEL
3. **Amount of material** to be extracted, moved, or proposed to be moved: 100,000 TONS PER YEAR
4. Will any **water, liquid chemicals, reagents, or other solutions** be used, produced or discharged as part of the mining or milling process? Yes (X) No ( ) If yes, please describe (add extra pages if needed): WATER FOR WASHING SAND
5. Provide a brief **description of the proposed mining operation**, and onsite processing facilities (add extra pages if necessary). PLEASE SEE ATTACHMENT A.
6. ( ) **New Road(s):** Length \_\_\_\_\_ (ft), Width \_\_\_\_\_ (ft)
7. (X) **Improved Road(s):** Describe improvements that need to be made to existing roads to access the site, including the Length 200 (ft) and Width 12 (ft) of new disturbances.  
WIDEN EXISTING ROAD ANOTHER 12 FEET.
8. Total project surface **acreage to be disturbed:** 5 (acres) PLEASE SPECIFY EXACT ACREAGE (this will be used to determine surety bond amount – see #VI). **COMPLETE**
9. Proposed **startup date** (month, year): JULY, 2014
10. Proposed **completion**, if known (month, year): TBD **OCT 08 2014**

**IV. OPERATION AND RECLAMATION PRACTICES** (Rule R647-3-107, 108 & 109)

The reclamation and operation obligation is to keep the area clean and safe, minimize hazards to public safety, return the land to a useful condition, and reestablish at least 70 percent of the premining vegetative ground cover or within practical limits. To accomplish this, the Permittee / Operator will need to perform reclamation concurrently, or at the completion (within one (1) year) of mining. Please refer to The Practical Guide to Reclamation in Utah, available at::

[https://fs.ogm.utah.gov/pub/MINES/Coal\\_Related/RecMan/Reclamation\\_Manual.pdf](https://fs.ogm.utah.gov/pub/MINES/Coal_Related/RecMan/Reclamation_Manual.pdf).

1. *Keep the mining operation in a safe, clean, and environmentally stable condition.*
2. *Permanently seal all shafts and tunnels to prevent unauthorized or accidental entry.*
3. *Plug drill holes with a five foot cement surface plug. Holes that encounter fluids are to be plugged in the subsurface to prevent aquifer contamination.*
4. *Construct berms, fences, or barriers, when needed, above highwalls and excavations.*
5. *Remove, isolate, or neutralize all toxic materials in a manner compatible with federal and state regulations.*
6. *Remove all waste or debris from stream channels.*
7. *Dispose of any trash, scrap metal, wood, machinery, and buildings.*
8. *Conduct mining activities so as to minimize erosion and control sediment.*
9. *Reclaim all roads that are not part of a permanent transportation system.*
10. *Stockpile topsoil and suitable overburden prior to mining.*
11. *Stabilize highwalls by backfilling or rounding to 45 degrees or less, where feasible; reshape the land to near its original contour, and redistribute the topsoil and suitable overburden.*
12. *Properly prepare seedbed to a depth of six inches by pocking, ripping, discing, or harrowing. Leave the surface rough.*
13. *Reseed disturbed areas with adaptable species. (The Division recommends a mixture of species of grass, forb, and browse seed, and will provide a specific species list if requested.)*
14. *Plant the seed with a rangeland or farm drill, or broadcast the seed. Fall is the preferred time to seed.*

**V. VARIANCE REQUEST** (Rule R647-3-110)

**Any variance must be approved writing *in advance* by the Division**

Any planned deviations from Rules R647-3-107, Operation Practices, R647-3-108, Hole Plugging Requirements, or R647-3-109, Reclamation Practices, as summarized above (see IV. Operation and Reclamation Practices Item # 1-14), should be identified below listing applicable rule number. Give justification for the variance(s) and alternate methods or measures to be utilized to meet the intent of the rule. Written approval from the Division will be given, if the proposed alternative methods to be used are consistent with the Act.

**Are variances being requested? Yes (    ) No ( X )**

Justification: \_\_\_\_\_

Alternate methods or measure to be utilized: \_\_\_\_\_

Attach additional page(s) if more variances are requested.

**VI. SURETY** (Utah Code Ann. §40-8-7(1)[c])

**A reclamation contract and surety must be provided to and approved by the Division prior to commencement of operations. No surface disturbance is authorized until the surety is posted and approved in writing.** The surety may be provided in the form of a certificate of deposit, a letter of credit, a surety bond, or cash. Please contact the Division for further information about submitting the surety. All mining operations are required to furnish and maintain reclamation surety to guarantee that the land affected is reclaimed (Utah Code Ann. §40-8-7(1)[c]).

The reclamation surety amount is based on the nature, extent and duration of operations. The amounts are based on data from current large mine surety and are used as a general guide, along with actual site conditions. Reclamation surety for small mines is reviewed every three (3) or five (5) years and adjusted as necessary for inflation/deflation based upon acceptable Costs Index. **Contact the Division for the dollar amount required for a three (3) or five (5) year period for this project.**

## ATTACHMENT A

This information includes additional information required to complete form MR-SMO

### 1. Section II, Project Location and Map

- a. Project Location
  - i. This project would be located in Section 19, Township 10S, Range 1W, and would cover 5 acres.
  - ii. Map 1: General Map "Drivers Map"
  - iii. Map 2: Operations map.
  - iv. Map 3: Operations map with scale.

### 2. Section III, Operation Plan

- a. Brief description of the proposed mining operation and on site processing facilities.
  - i. The TM Crushing site would consist of one crushing mine area. Access to the SMO site would be a Dirt road that leaves tunnel road about 1 mile south of the junction with SR6.
- b. Mine Area: the mine area would cover approximately 4.69 acres. Prior to construction of the mine area, topsoil would be stripped to approximately 6 inch deep and stored in a single stockpile containing approximately 4033 cubic yards (CY) covering roughly .20 acres. The stockpile would be located on the east side of the mine area away from drainage rills and active work areas.
  - i. The mine area would be graded to be flat and would house equipment and truck parking area. Material will be placed in piles around the plant using a front end loader.
  - ii. Storm water runoff intercepting the mine would be directed toward the south side of the mine area pad. Erosion and sediment control structures, such as straw logs and diversion ditches, would be installed where appropriate to prevent off-site sediment and erosion issues.
- c. Mine Access Road: The mine access road would cover approximately .11 acres. It would be app 200 feet long with an average total width of 24 feet. It would run from the mine area to the connection at tunnel road.
- d. Storm water intercepting the mine area would be directed south. Erosion and sediment control structures, such as straw logs and diversion ditches, would be installed to prevent storm water run on, and off site sediment and erosion issues.

### 3. Surety

- a. The surety required for this project will be provided in accordance to the DOGM.
